Conservation Tape that Lasts

Because paper is sensitive to its surroundings it can be severely affected by damp, changes in temperature and humidity, restriction of movement and exposure to light. With this in mind, UK Industrial Tapes Ltd is offering a specialist range of Conservation and archival grade adhesive tapes for use in picture framing, conservation mounting and packaging.

Their range offers permanent, double sided adhesive tapes that use a water based acrylic adhesive system, which will not react with sensitive papers. They are acid free, with a neutral pH of 7.70 and have high initial tack, use non-ageing adhesives that will not turn yellow.

They are ideal for adhering mats, moulding artwork, attaching dust covers and many other conservation applications, where a permanent bond is preferred.
